

Checking if a journal article is peer reviewed Resource (Source: UQ Library)

Is a journal peer reviewed?

Check **Ulrichsweb**

<input type="checkbox"/>			e	Australian Economic Papers
<input type="checkbox"/>				The Australian Economic Review
<input type="checkbox"/>			e	The Australian Economic Review
<input type="checkbox"/>				Club Management in Australia
<input type="checkbox"/>				Economic Society of Australia. Ecor
<input type="checkbox"/>				Reserve Bank of Australia. Bulletin
<input type="checkbox"/>				The Australian Retailer Magazine

A red circle highlights the Ulrichsweb logo in the fifth row, and a tooltip labeled "Refereed" points to it.

1. Enter the journal title in the search box.
2. A refereed icon appears next to the journal title if it is peer reviewed.
3. If there are no results, do a search in **Ulrichsweb** to find journals in your field that ARE peer reviewed

Be aware that not all articles in peer reviewed journals are refereed or peer reviewed, for example, editorials and book reviews.

If the journal is not listed in **Ulrichsweb**:

1. Go to the journal's website
2. Check for information on a peer review process for the journal. Try the *Author guidelines*, *Instructions for authors* or *About this journal* sections.

If you can find no evidence that a journal is peer reviewed, but you are required to have a refereed article, you may need to choose a different article.
